BaZi for Smart Money

Destiny and You

Every individual is bestowed with a set of unique DNA trait. This trait sets you apart from the person next to you and defines, at the very core, who you really are, physically and psychologically.

In a nutshell, the science of BaZi works similarly like a person's DNA. However, it identifies a person's unique characteristics, talents, strengths and weaknesses, and potential so that we can chart, decode and ultimately, design his or her Destiny.

It may seem like a clichéd statement, but undeniably, you are in control of your own Destiny. Your Destiny is laid upon you and you can easily design and steer it to your own advantage if you are aware of what has been bestowed upon you the moment you were born. This same awareness can lift you to a higher ground and strengthen your finance capability, especially in the area of investment, career, and sustaining wealth. If it's your dream of living the life where financial freedom and luxuries are a norm, you have to be smart and work towards it.

At the end of the day, who says Smart Money is not possible? You can achieve it too, if you grasp and utilize the knowledge of BaZi to turn your life towards the Destiny of your dream.

About BaZi

BaZi is literally translated as Eight Characters and is also known as the Four Pillars of Destiny. Developed by the Chinese, it is an ancient and sophisticated discipline of Personality Analysis, which utilizes birth information - date and time - to analyze and determine with much accuracy an individual's path in life.

Simply put, BaZi is a study of your Destiny. It is a tool that allows you to learn and assess what Destiny has in store for you. With foreknowledge, you already have the information you need to take the right measures to empower your Destiny and live the life you deserve.

Remember: Knowledge is power, and being forewarned is indeed forearmed. Know that your Destiny has been mapped out for you since birth, but also understand that you still play a pivotal role in making that all-important difference between ‘make’ and ‘break’.

In a nutshell, we study BaZi to:

- Make informed decisions;
- Maximize our potential in life;
- Strengthen our relationships with others;
- Understand other people better;
- Choose the right career path; and
- Apply classical Feng Shui* correctly.

* *BaZi is also known as the diagnosis to Feng Shui, which prescribes any remedies.*

With BaZi, you hold your Destiny in your hands, where you will be able to do the Right Thing, at the Right Time and in the Right Place. When we have that capabilities, we are in effect empowering ourselves to make the most of what life has to offer.

The Formula for Success

Preparation means maximizing your inborn talent, capabilities, fine tuning your personality and reach your true potential – becoming a BETTER YOU.

Opportunity refers to the power of anticipation, knowing what is coming your way.

Your BaZi can be viewed as the blueprint to your life’s ups and downs. It gives a rather complete overview of your life and it helps you to shine a light on your obvious and hidden personality, characteristics and talents, and discover your unique ability to amass wealth and find happiness. Your BaZi shows the path most suitable for you, in order to align yourself with your potential wealth and business opportunities.

In this view, your BaZi reveals the approach on how to better realize the opportunity around you, and prepares you to face (and avoid) potential “bad patches” in your life. BaZi can help you make use

of the many (or few) talents that you have and capitalize on the wealth opportunities that come your way. In other words, your BaZi is the warning siren of your life, making sure you are aware, and take the necessary precautions, to remedy every predicament in your life.

What's BaZi Got to do with Smart Money?

The answer to the above question is a fairly simple one. Most of us want to grow rich, retain a certain legacy of wealth and to have our names plastered on the cover of Fortune magazine. Who doesn't? However, a burning question stands in our way - how do we get there?

In BaZi, everything begins with awareness. It is possible for an individual to maximize their potential to obtain wealth through the knowledge of Chinese Metaphysics. Depending on your applications and actions, wealth will be a part of your life if you have a clear awareness of what you have in you, and how to use that to achieve what you want.

In a way, BaZi can be utilized to attain Smart Money. On the other hand, deploying Feng Shui can help increase one's chances to gain Dumb Money.

But before all that, what does "Smart Money" mean?

- Money that can work for you to generate continuous wealth or profits
- Wealth attained through innovation or creating intellectual property or art that can give wealth a lasting and self-perpetuating quality
- Wealth creation through skills or talents and not pure opportunism

Through BaZi, you can get closer to Smart Money by tapping and locating where your talents and capabilities lie. Focus and nurture these qualities to make them your pivotal tool to assist you in your accumulation of wealth. Opportunism aside, Smart Money has everything to do with your effort, talent and your work dedication in sustaining a lasting fortune. Your BaZi can reveal whether your hard work and dedication are put to a good use; that is, whether they are in the right path, right way or the right time to your road of prosperity.

BaZi doesn't only scratch the surface; it dwells deeper into uncovering your hidden talent to enable you to realize your "actual" role, and what you're really capable of achieving. Ultimately, it helps you to make better and more informed decision in the wealth and business aspect of your life.

Better Decision Making Starts with You

In our daily lives, we simply cannot avoid making decision. Decisions we made daily are based on what options we are presented with. The better our options, the better our decisions. Quality decisions can dictate the quality and path of our life.

In BaZi Astrology, you will learn that different personality profiles approach their decisions in their own unique way based on the perception of their choices. Each profile views the same alternative differently in terms of risk assessment, opportunity spotting and potential judgment. Understanding how each profile behaves will provide you with an insight on how they make decisions, which can ultimately influence or inspire them to make better quality decisions.

Your decision can make or break certain deal or potentials of your life. By understanding and studying your Profile and Structure criteria, you would know your strengths and weaknesses clearly, and use them as a guide to help you make careful and articulated decisions. When this change occurs, it will eventually improve your quality of life.

About BaZi Profiling

BaZi Profiling is based on the fundamental premise that each of us has a dominating energy that drives us in all that we do. This dominant behavior pattern or personality profile becomes our greatest strength. As we tend to use it excessively, it can also become both our major flaw or vice. This applies in all areas of our life.

BaZi Profiling is a diagnostic tool that describes how we function inside – basically reveals our basic or inborn personality structure.

It does not really tell us what we think. However, it can describe with unnerving accuracy at times the processes by which we arrive at what we think. It does not predict how we will behave but it can describe how other people with our style (not “type” as our BaZi Profiling style is something we do, not who we are) frequently behave and that is enough to make us more aware of our behavior.

Learning of our BaZi Profile style is a matter of inference – realizing the deeper reason behind a myriad of different sorts of behaviors. BaZi Profiling is easy to learn superficially and yet hard to learn proficiently because it is about people, and people are wondrously complex.

To start off, you will learn about the three levels of BaZi:

Level 1: Day Master

Who You Are – Reveals your basic character, your essential personality traits, strengths and weaknesses.

Level 2: Structures

How You Approach the World – Reveals your personality in relation to the world, your mode of operation in terms of behavior and attitude.

Level 3: Profile

What You Do – Reveals your individual lifestyle, roles you play in the world as a unique individual.
