Didn't receive your confirmation email?

Here Are the **Two** Most Common Reasons

1 The confirmation email is in your Spam or Junk Folder.

2 Your email provider may have blocked our email from reaching your inbox.

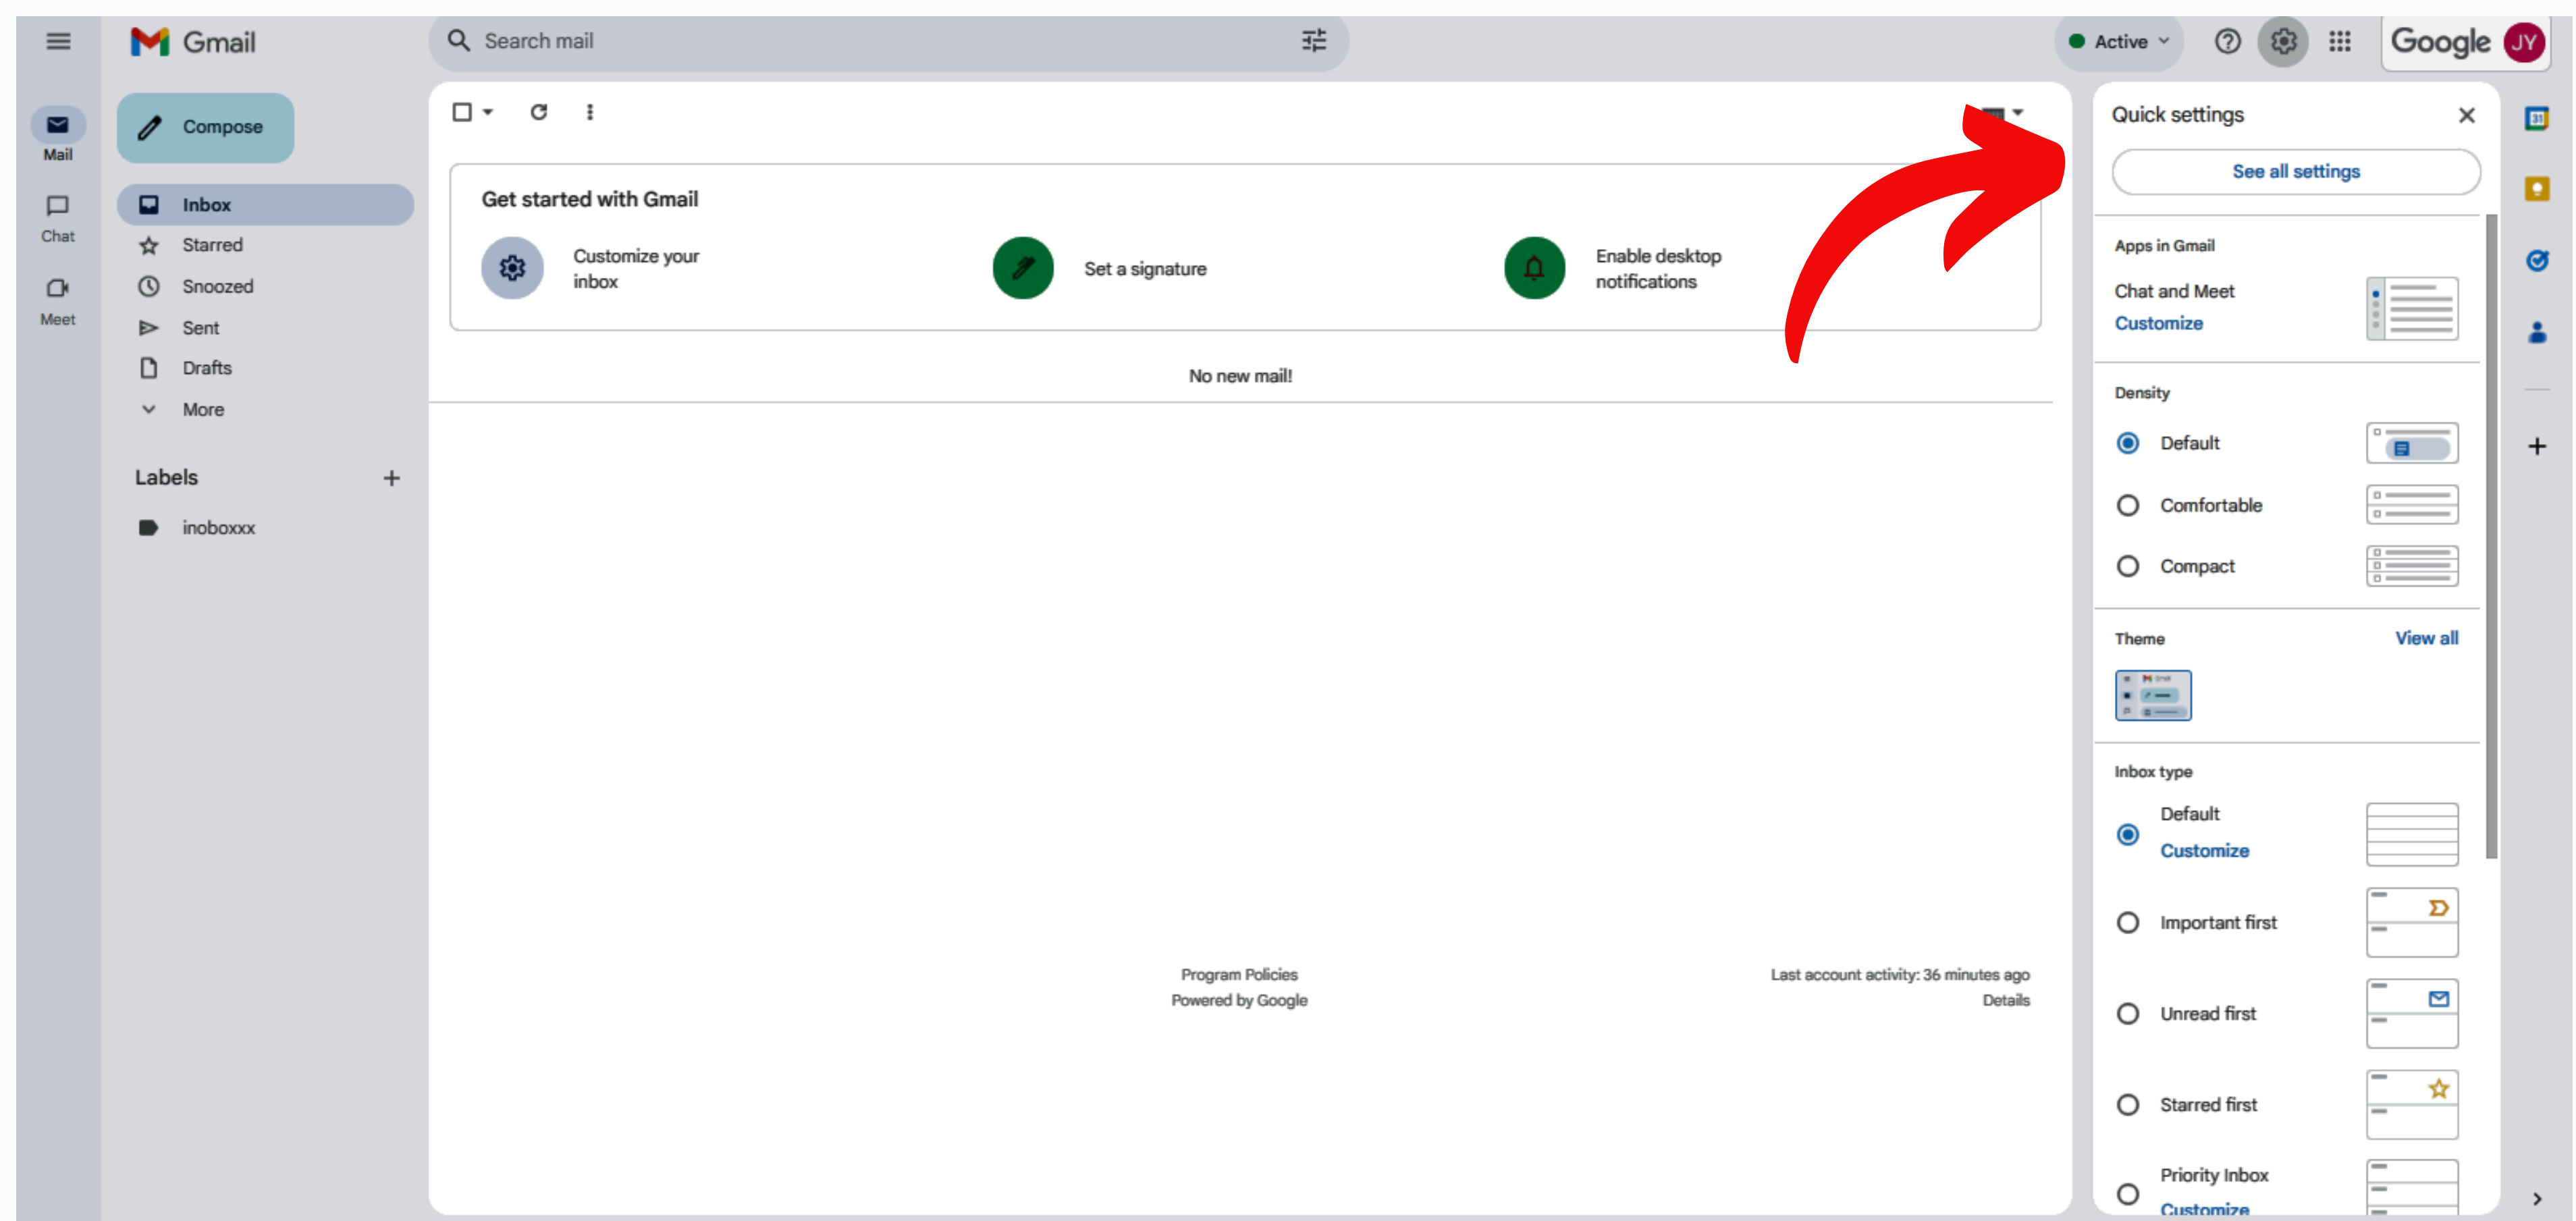

If you are facing this issue, Here's a simple, **step-by-step guide** to help resolve this.

STEP 1:

Go to your email inbox.

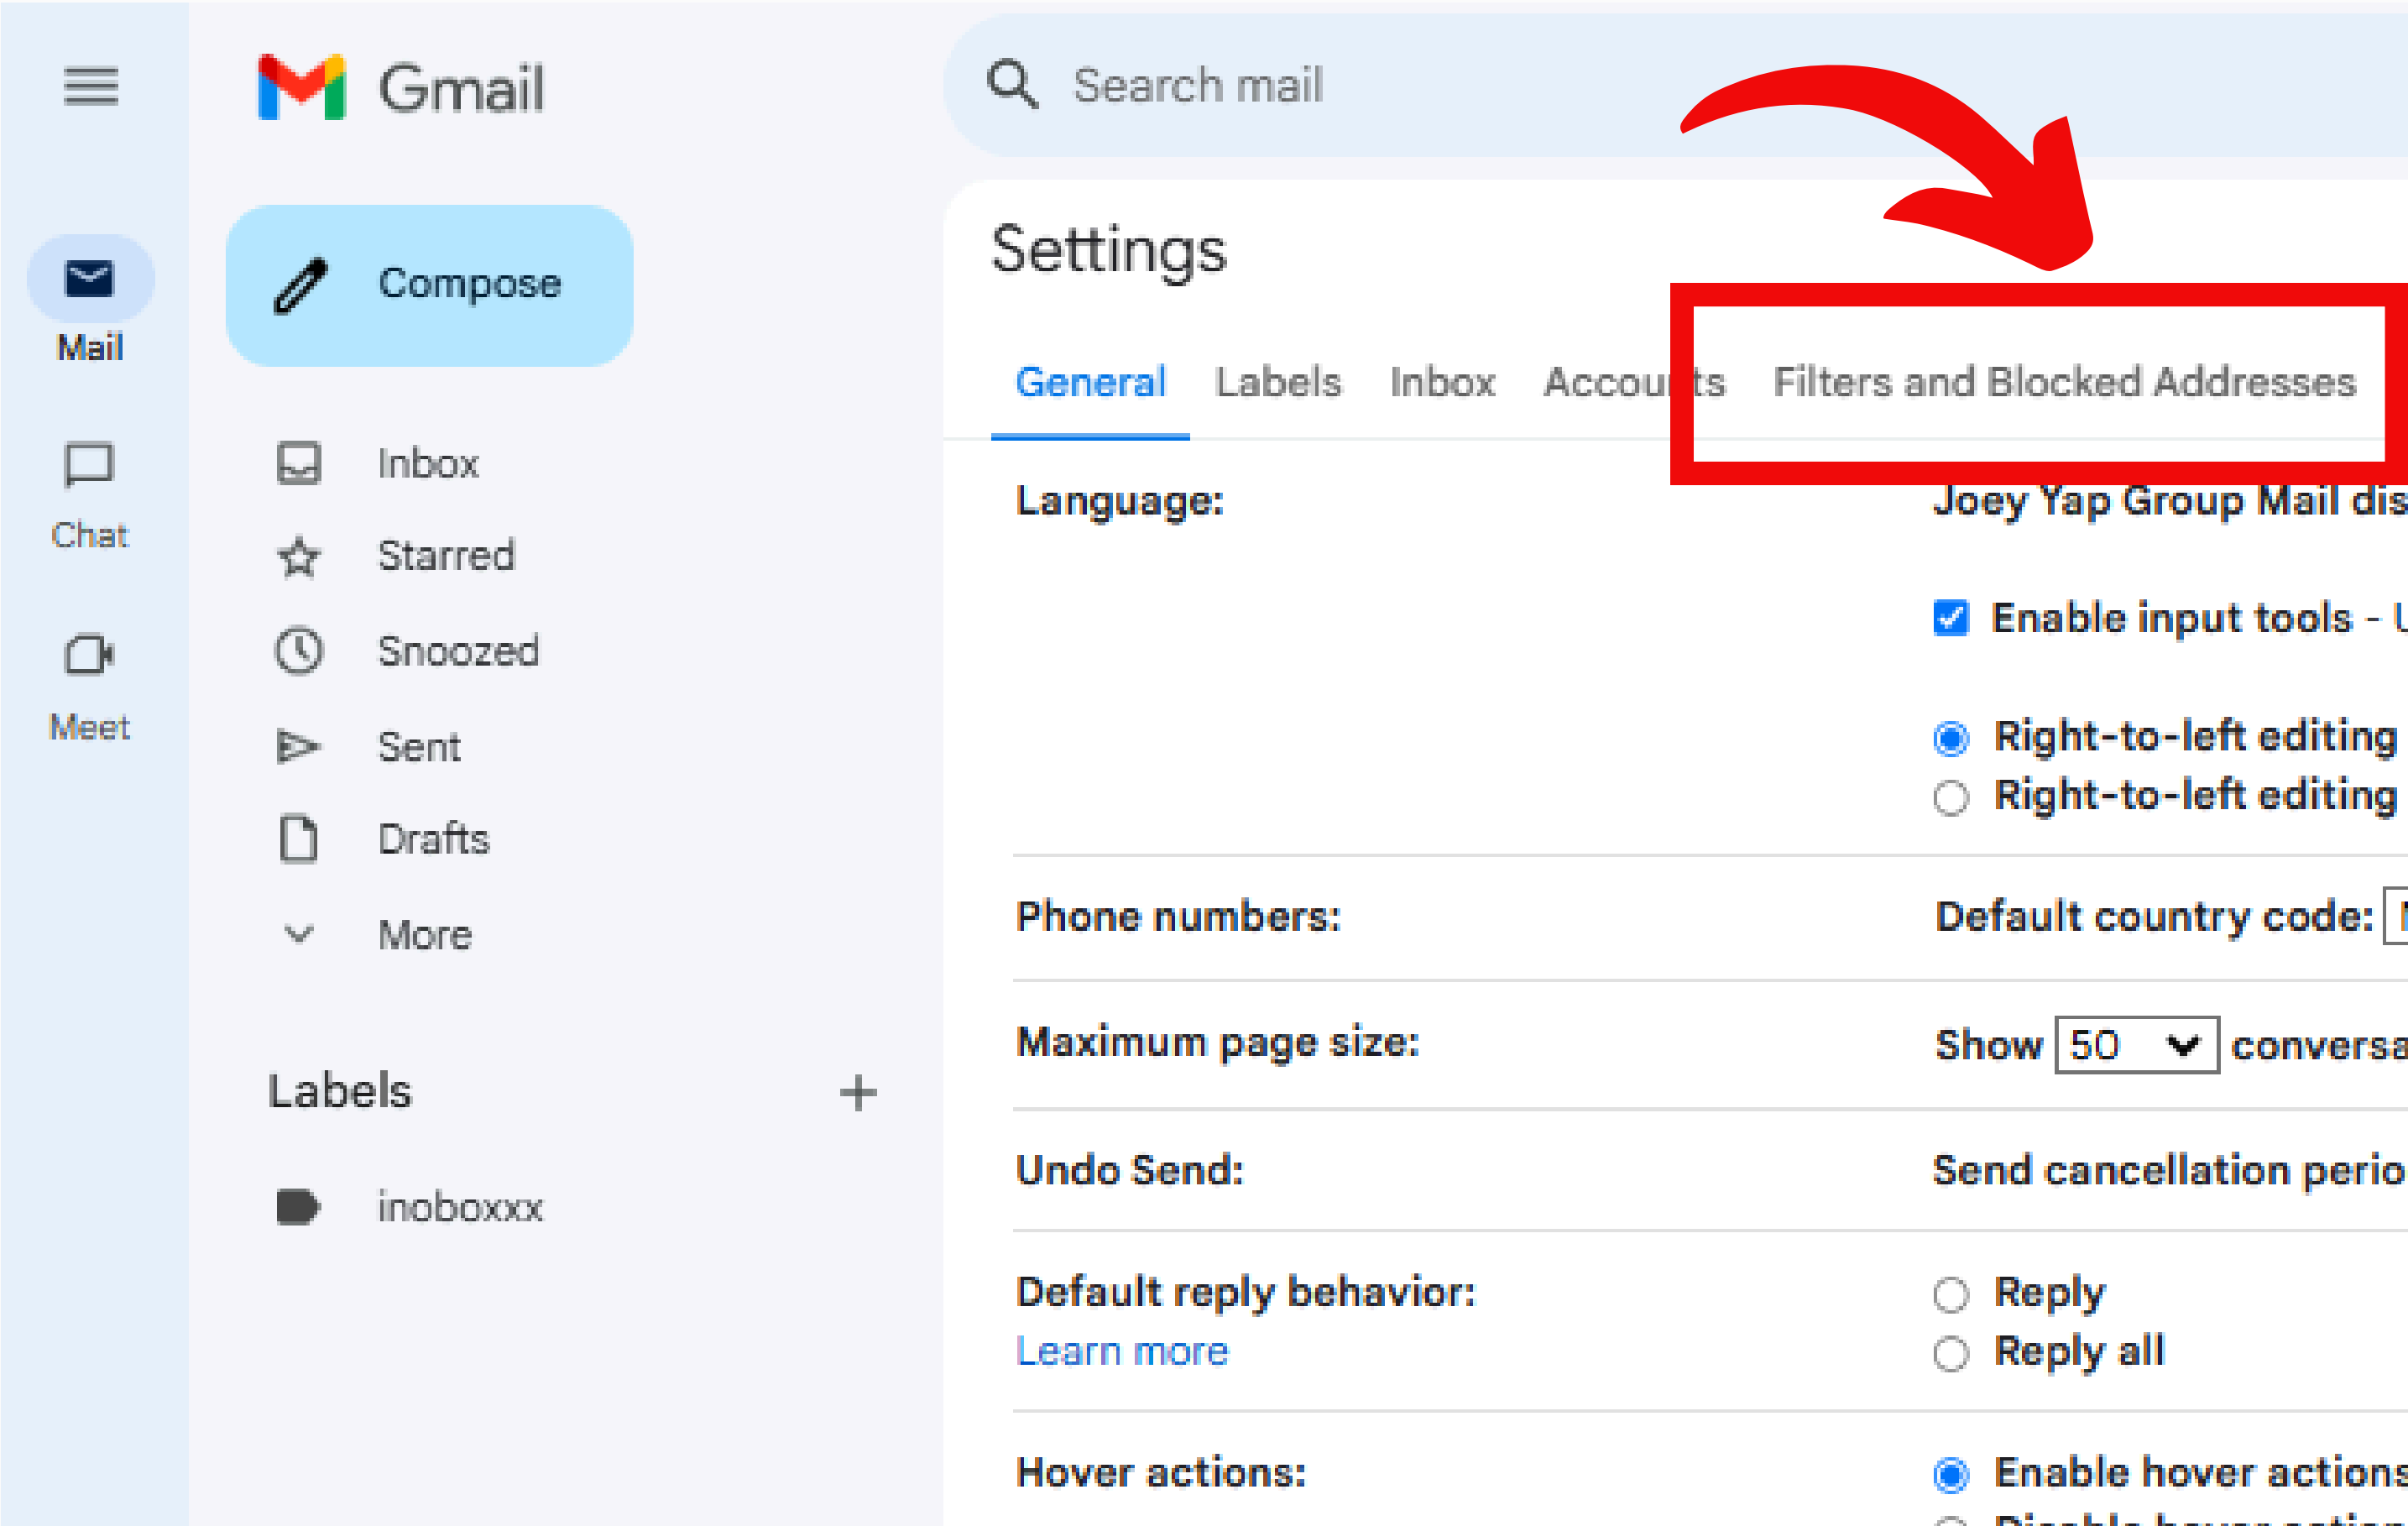

STEP 2:

From your inbox screen, select **Settings** (gear icon) on the top right of your screen, and click on “**See All Settings**”.

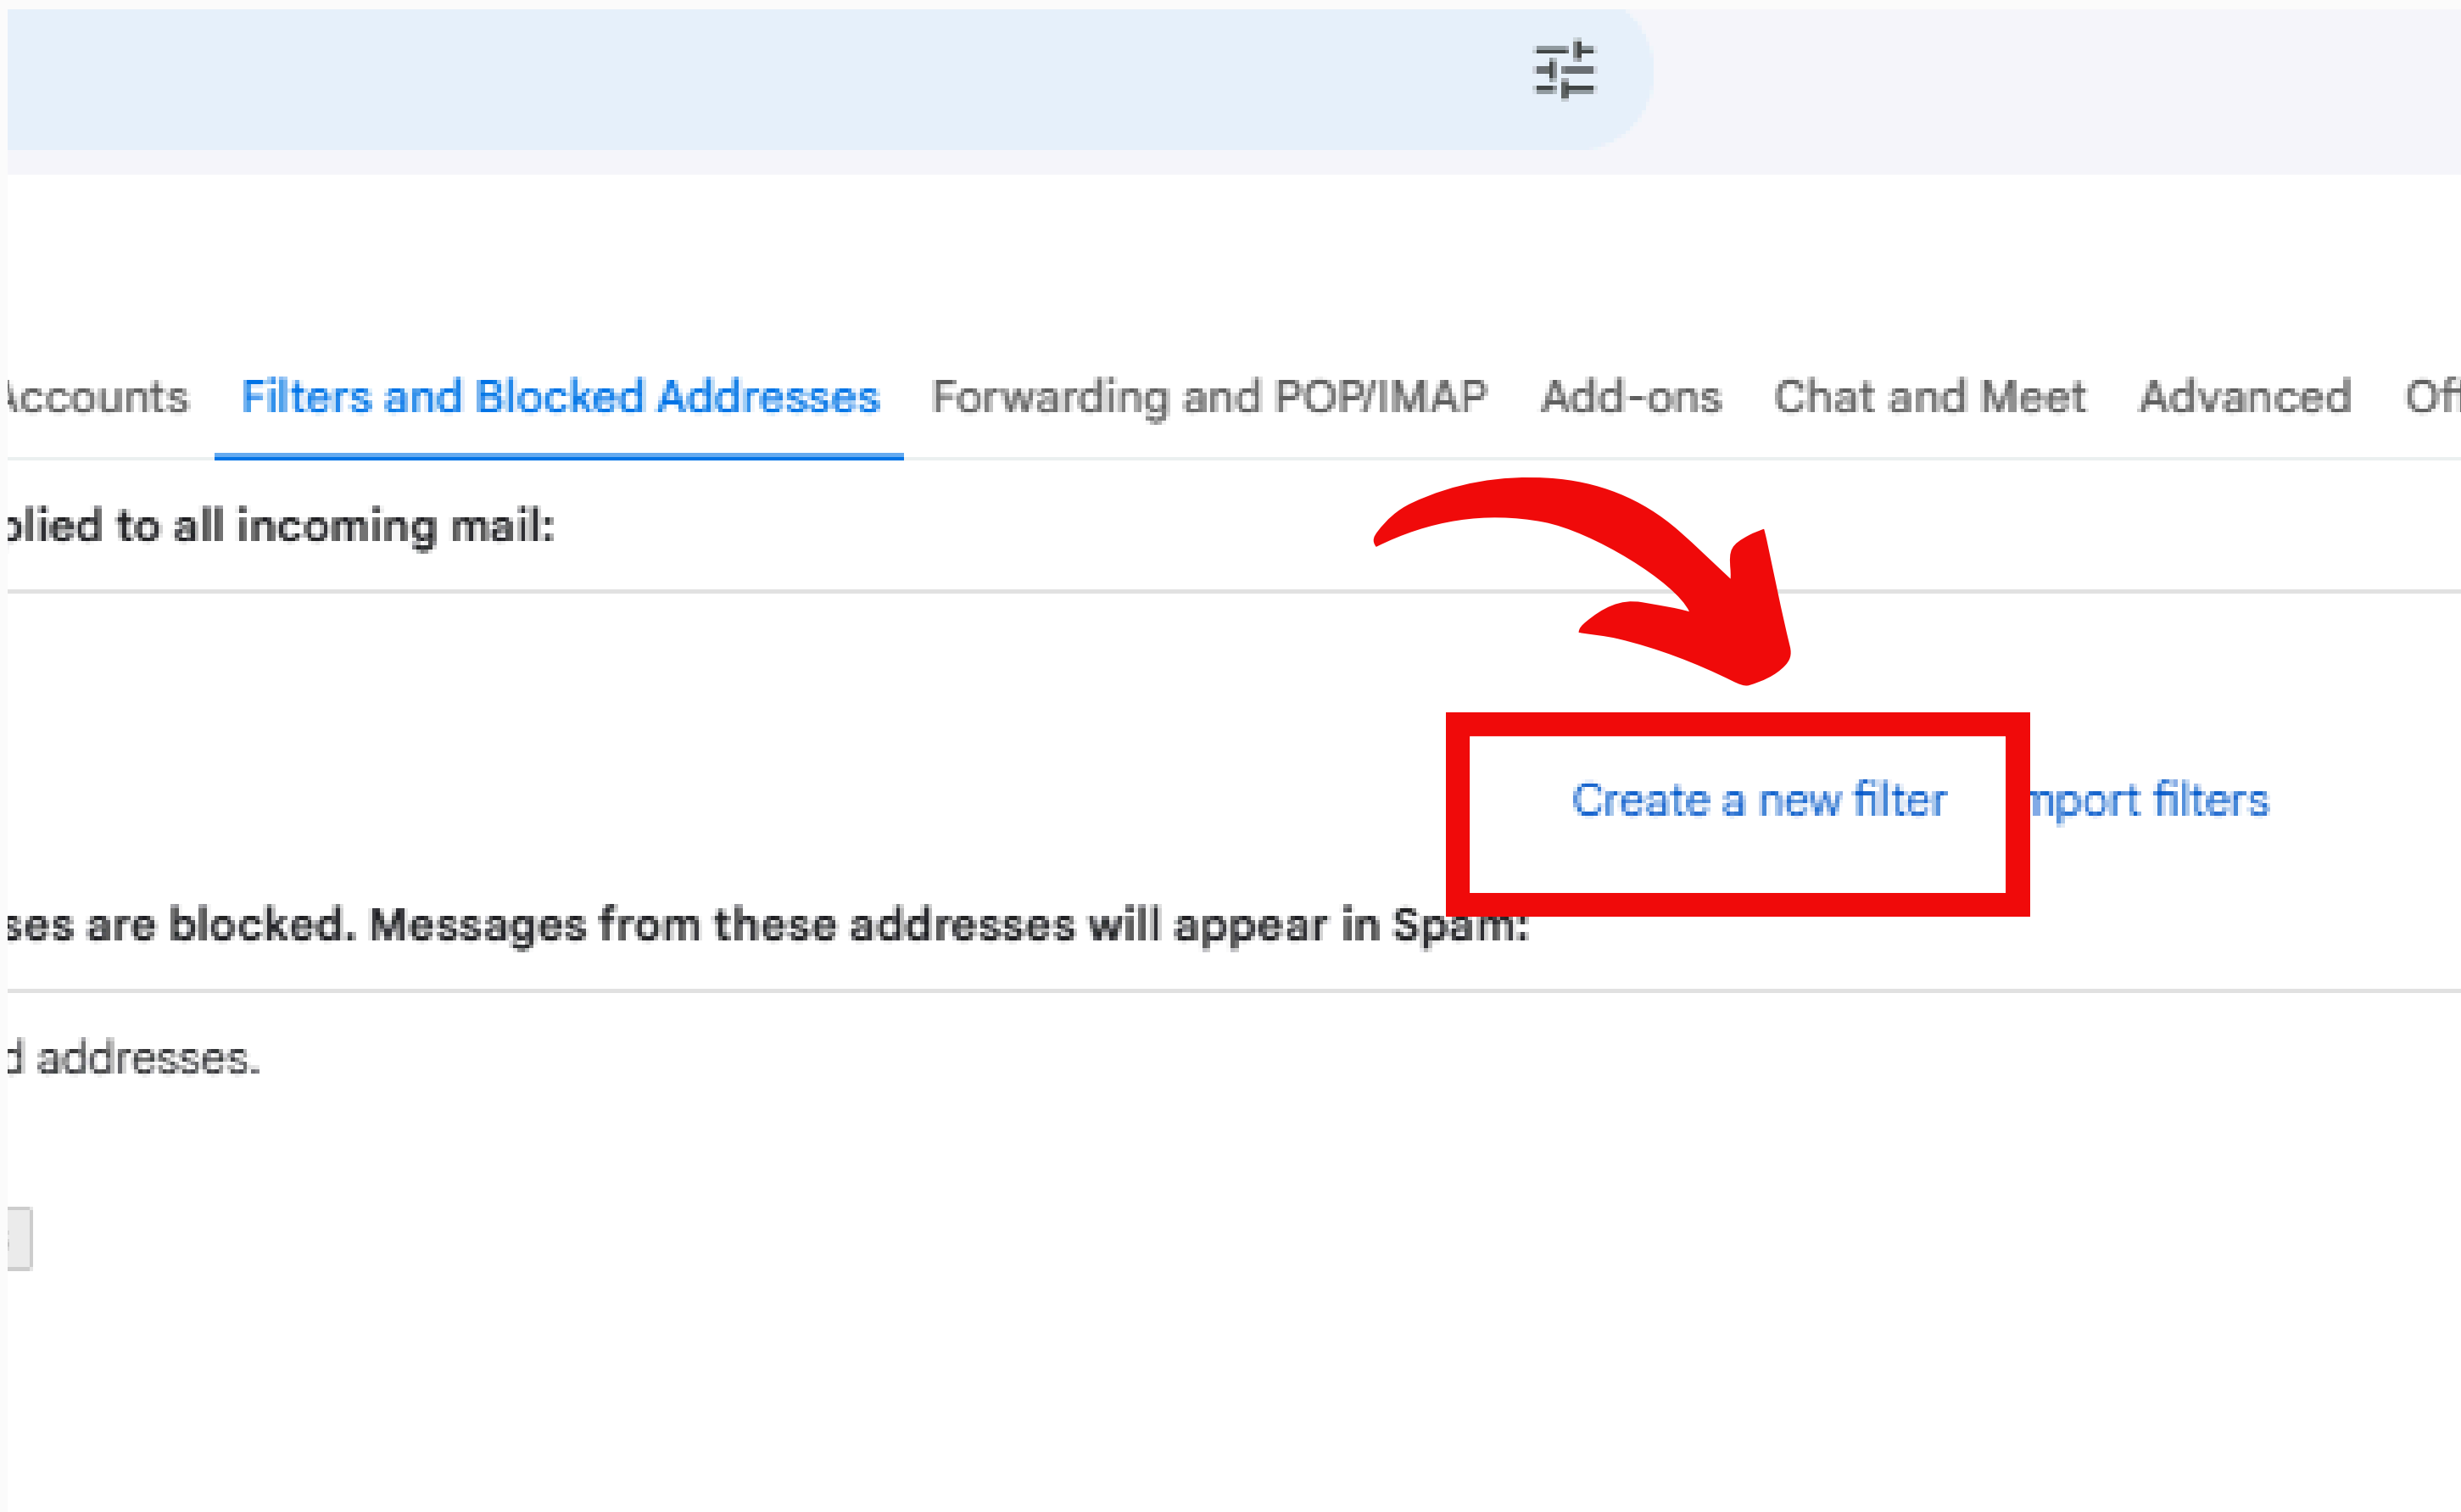

STEP 3:

Select **Filters and Blocked Addresses** from the navigation links at the top.

STEP 4:

Select **Create a new filter**.

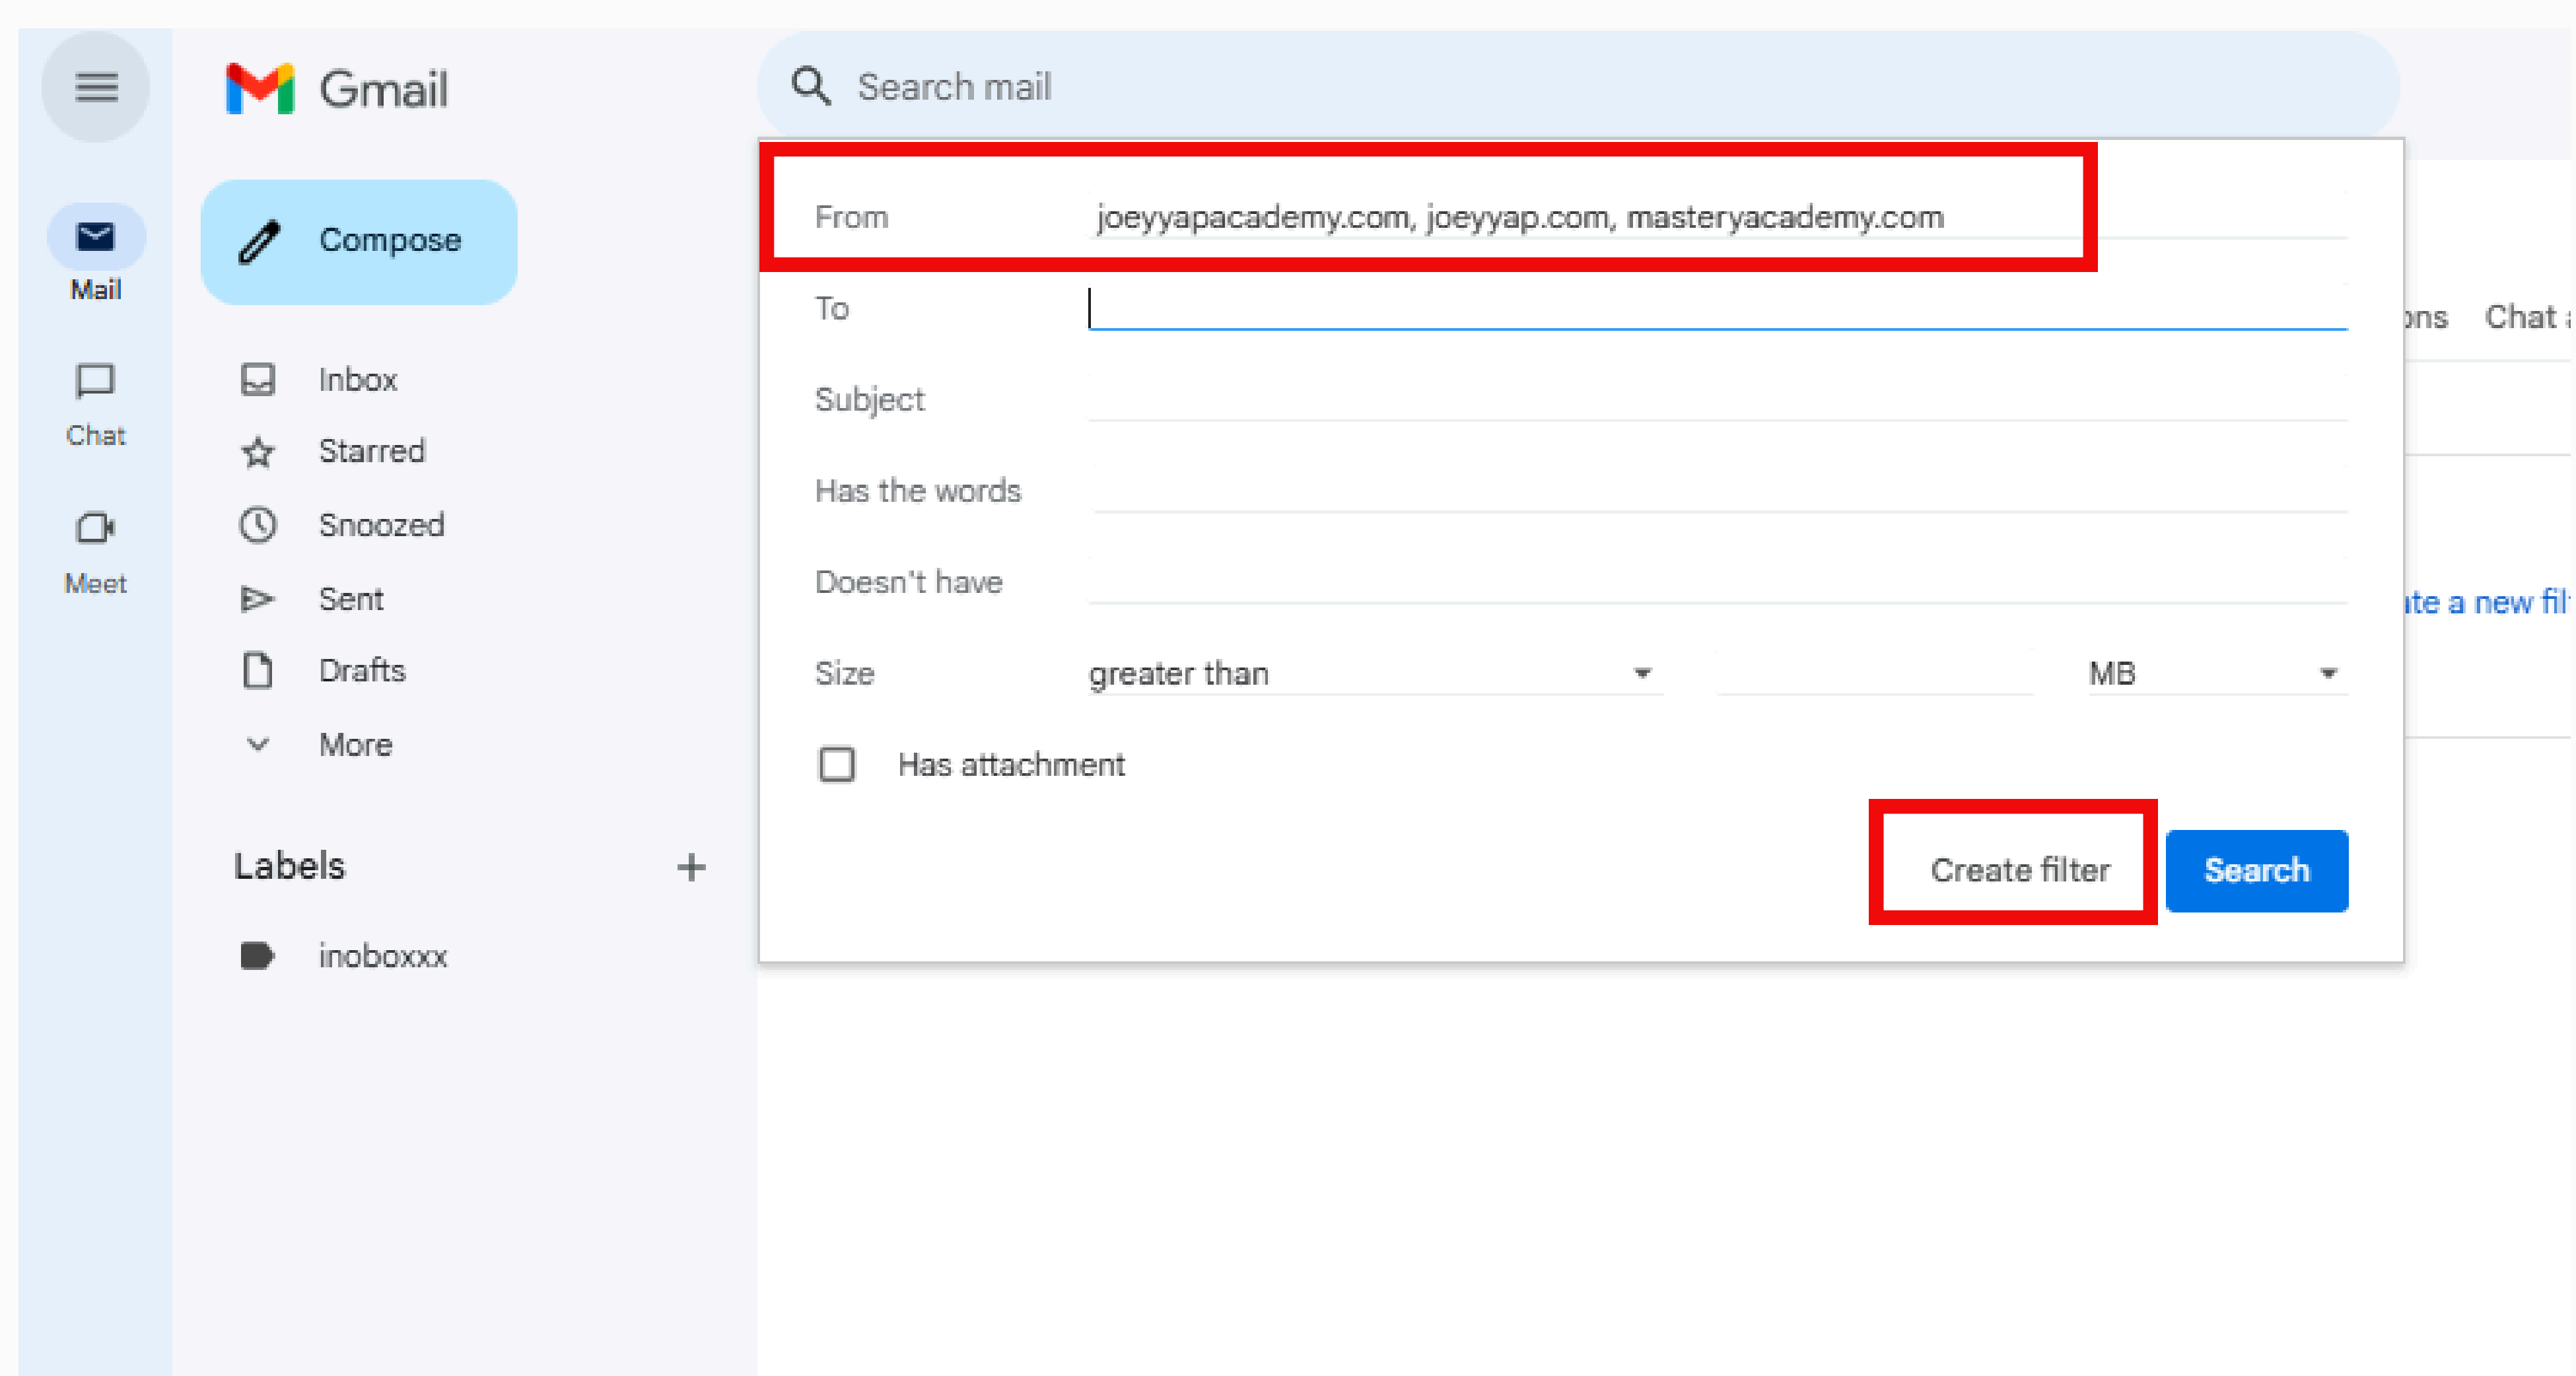

STEP 5:

In the **Search mail** form, enter these domain names into the **From** section:

1. joeyyapacademy.com

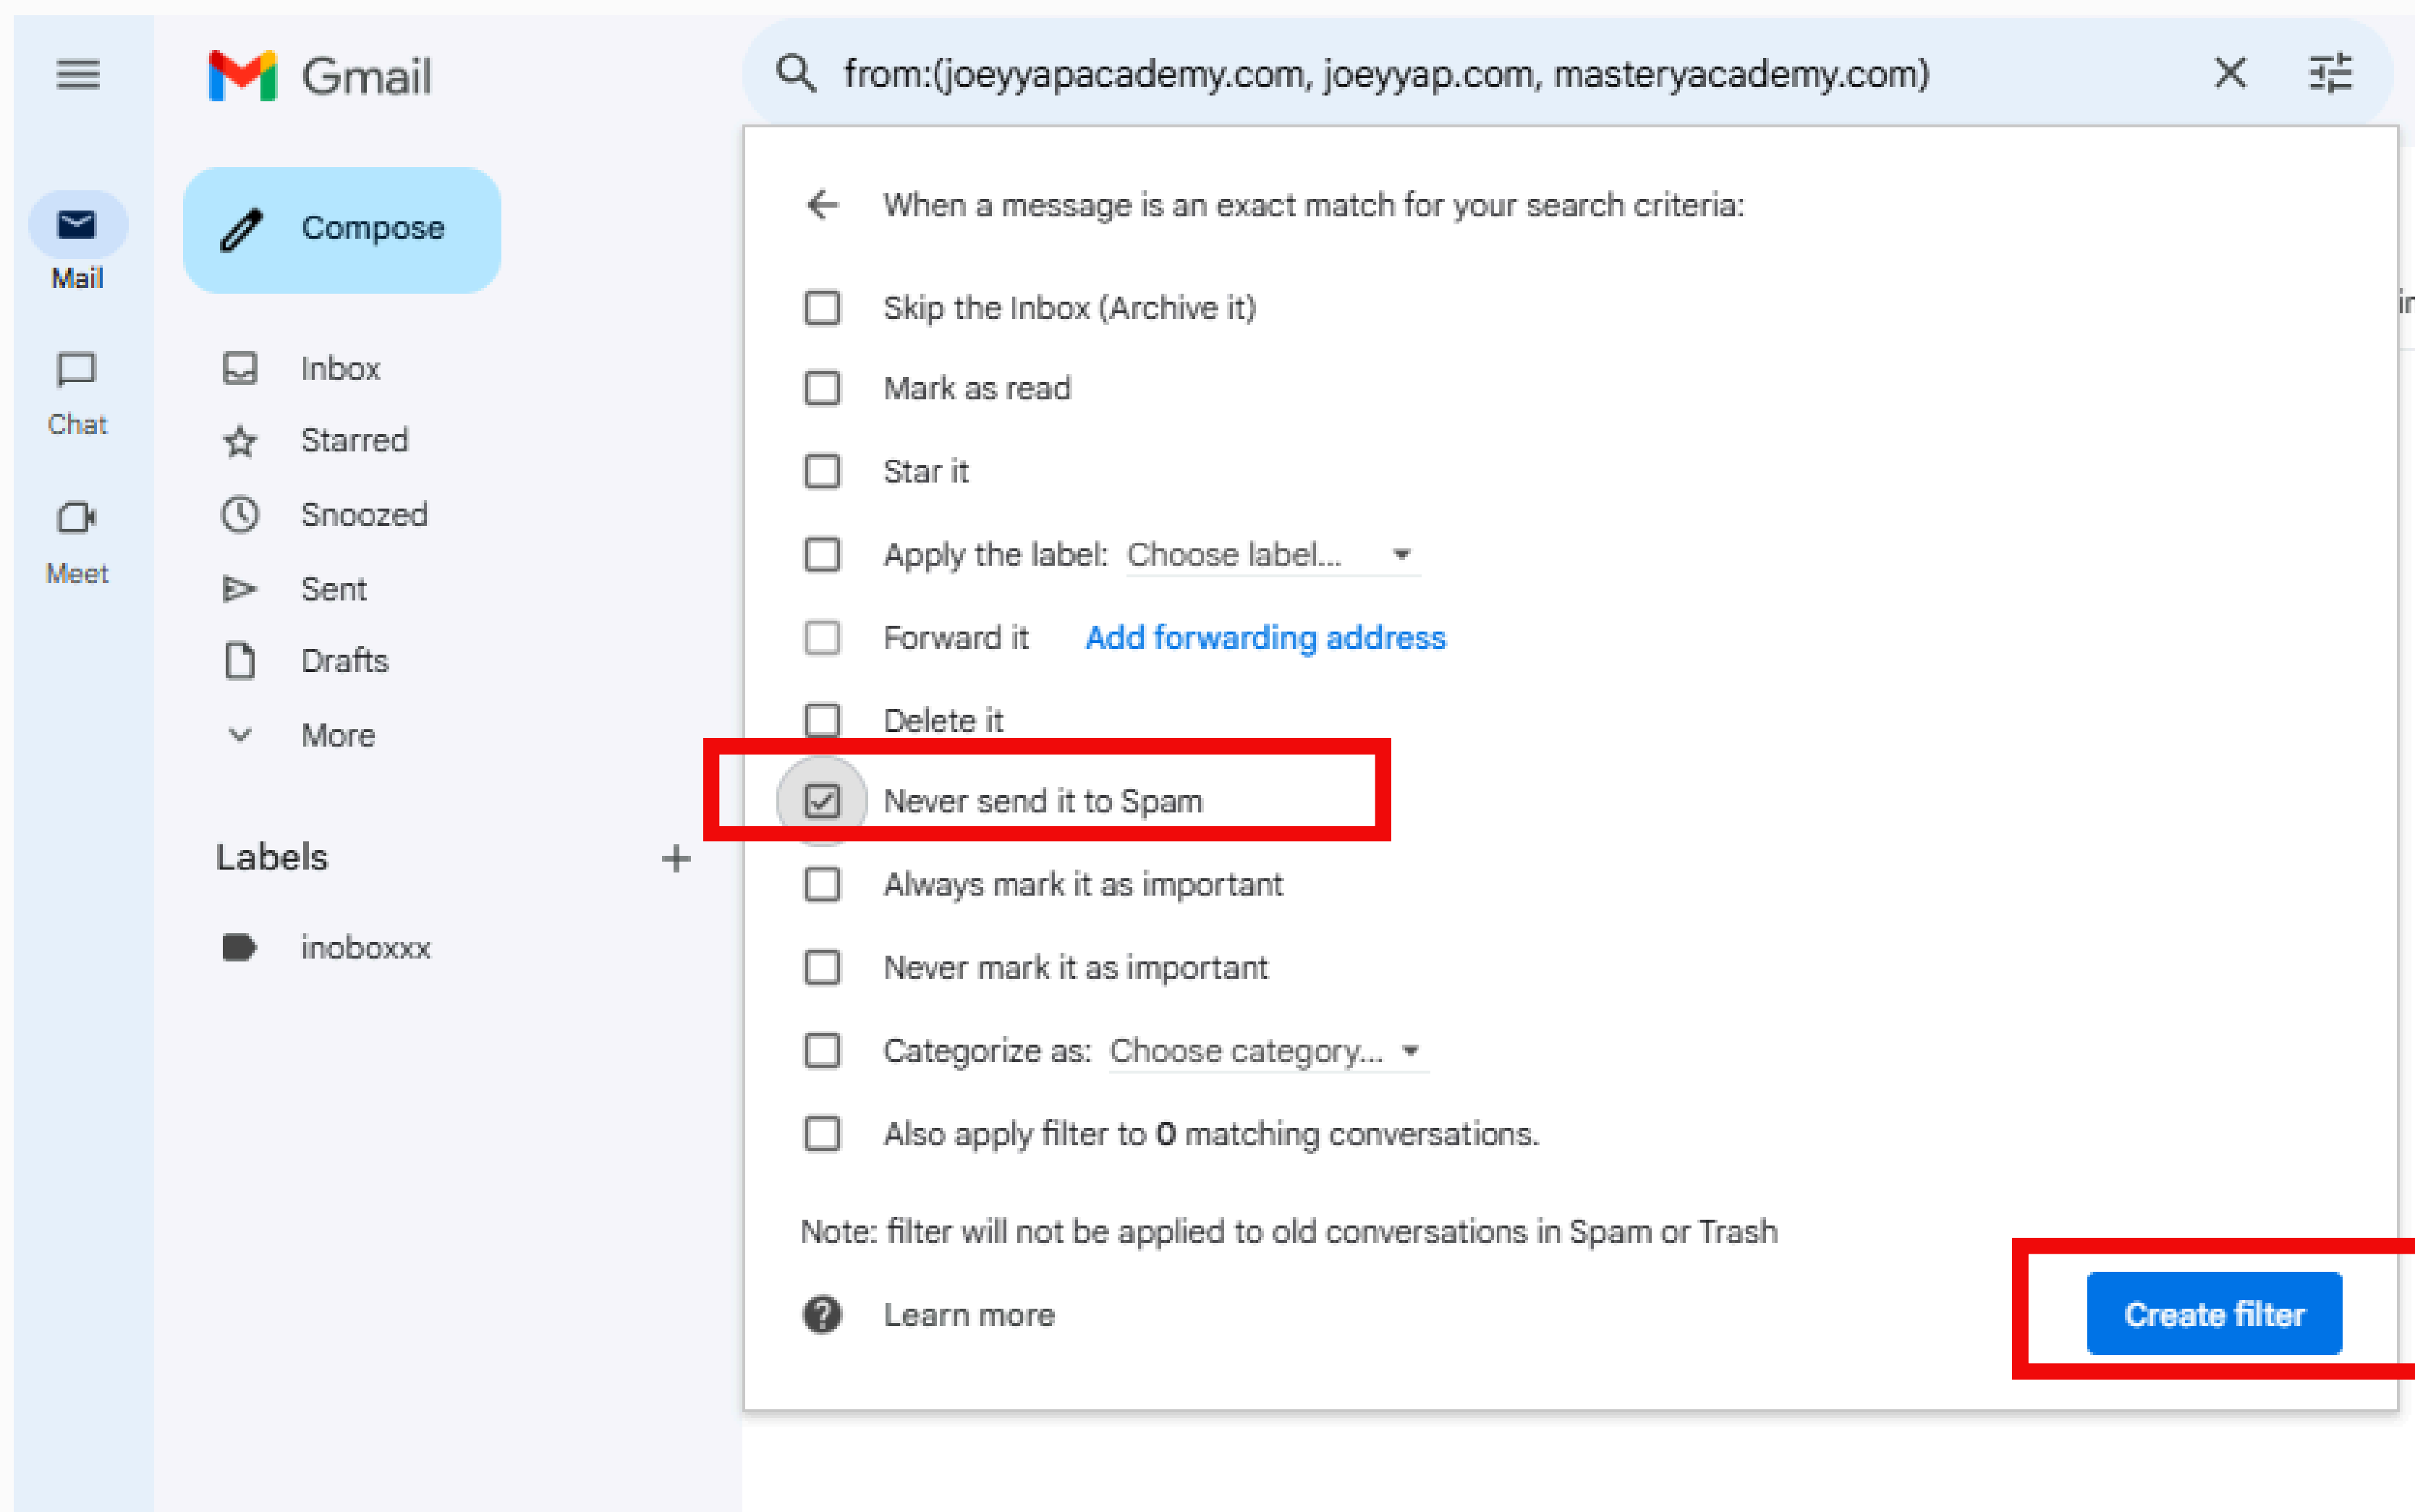

2. joeyyap.com

and select **Create filter**.

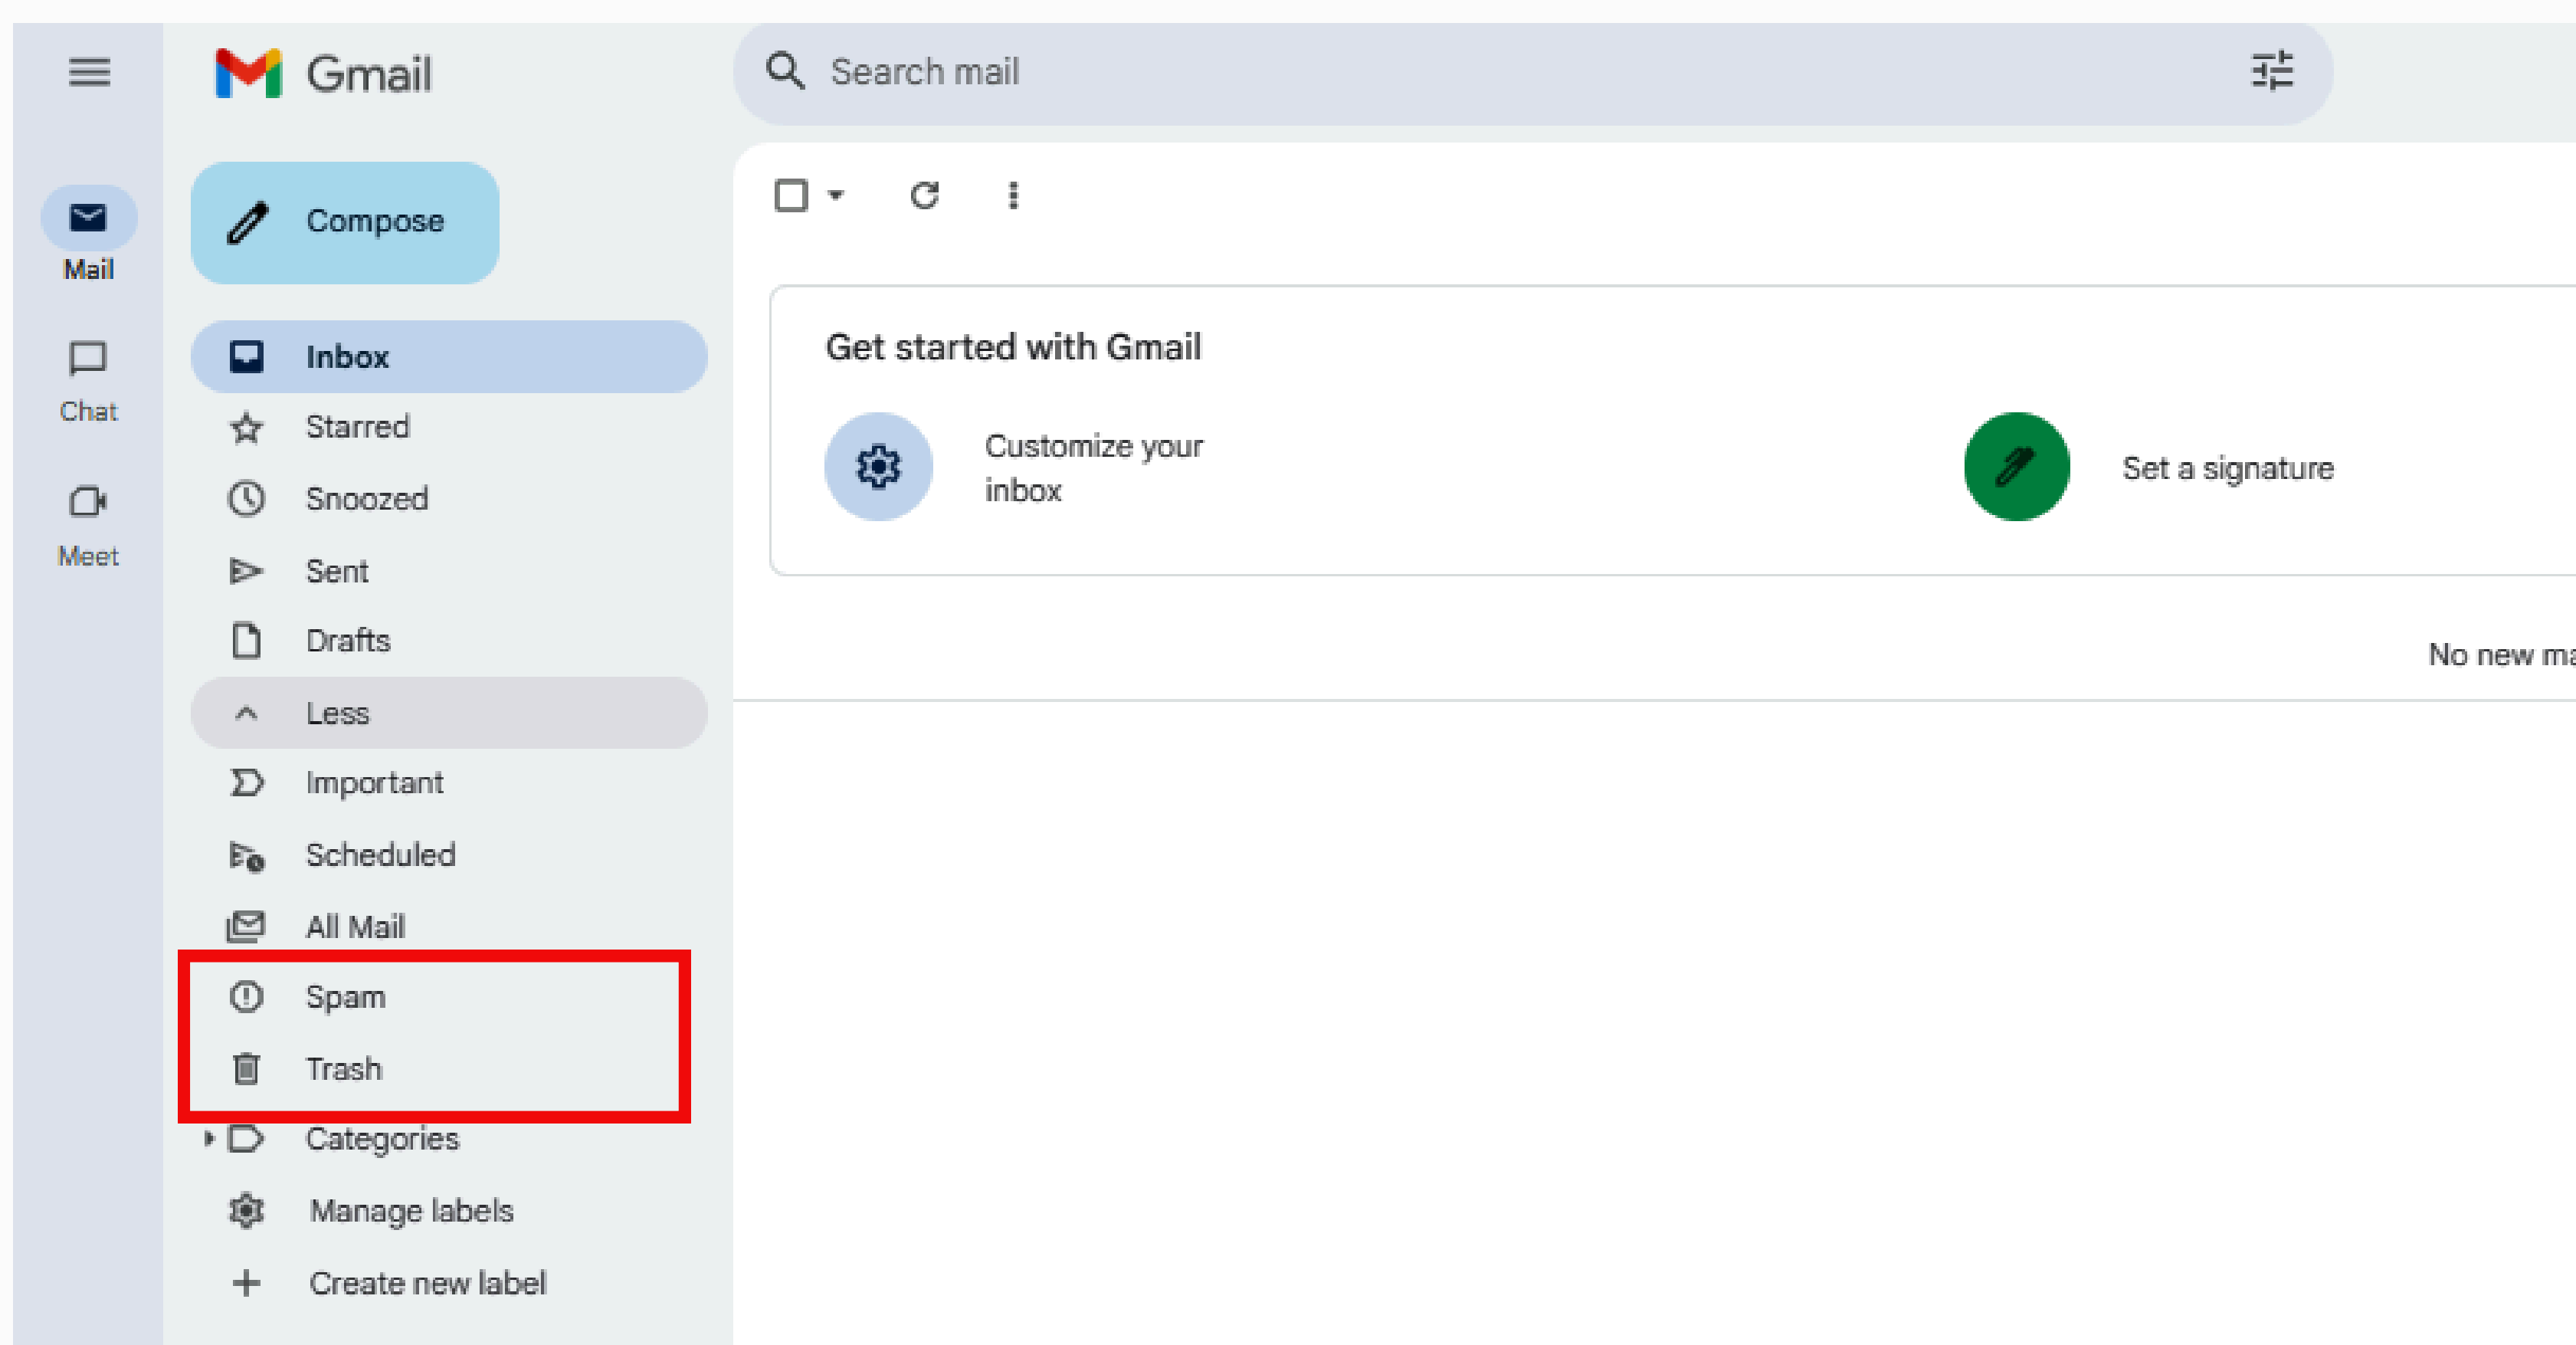

STEP 6:

On the next form, select **Never send it to Spam** and click **Create filter**.

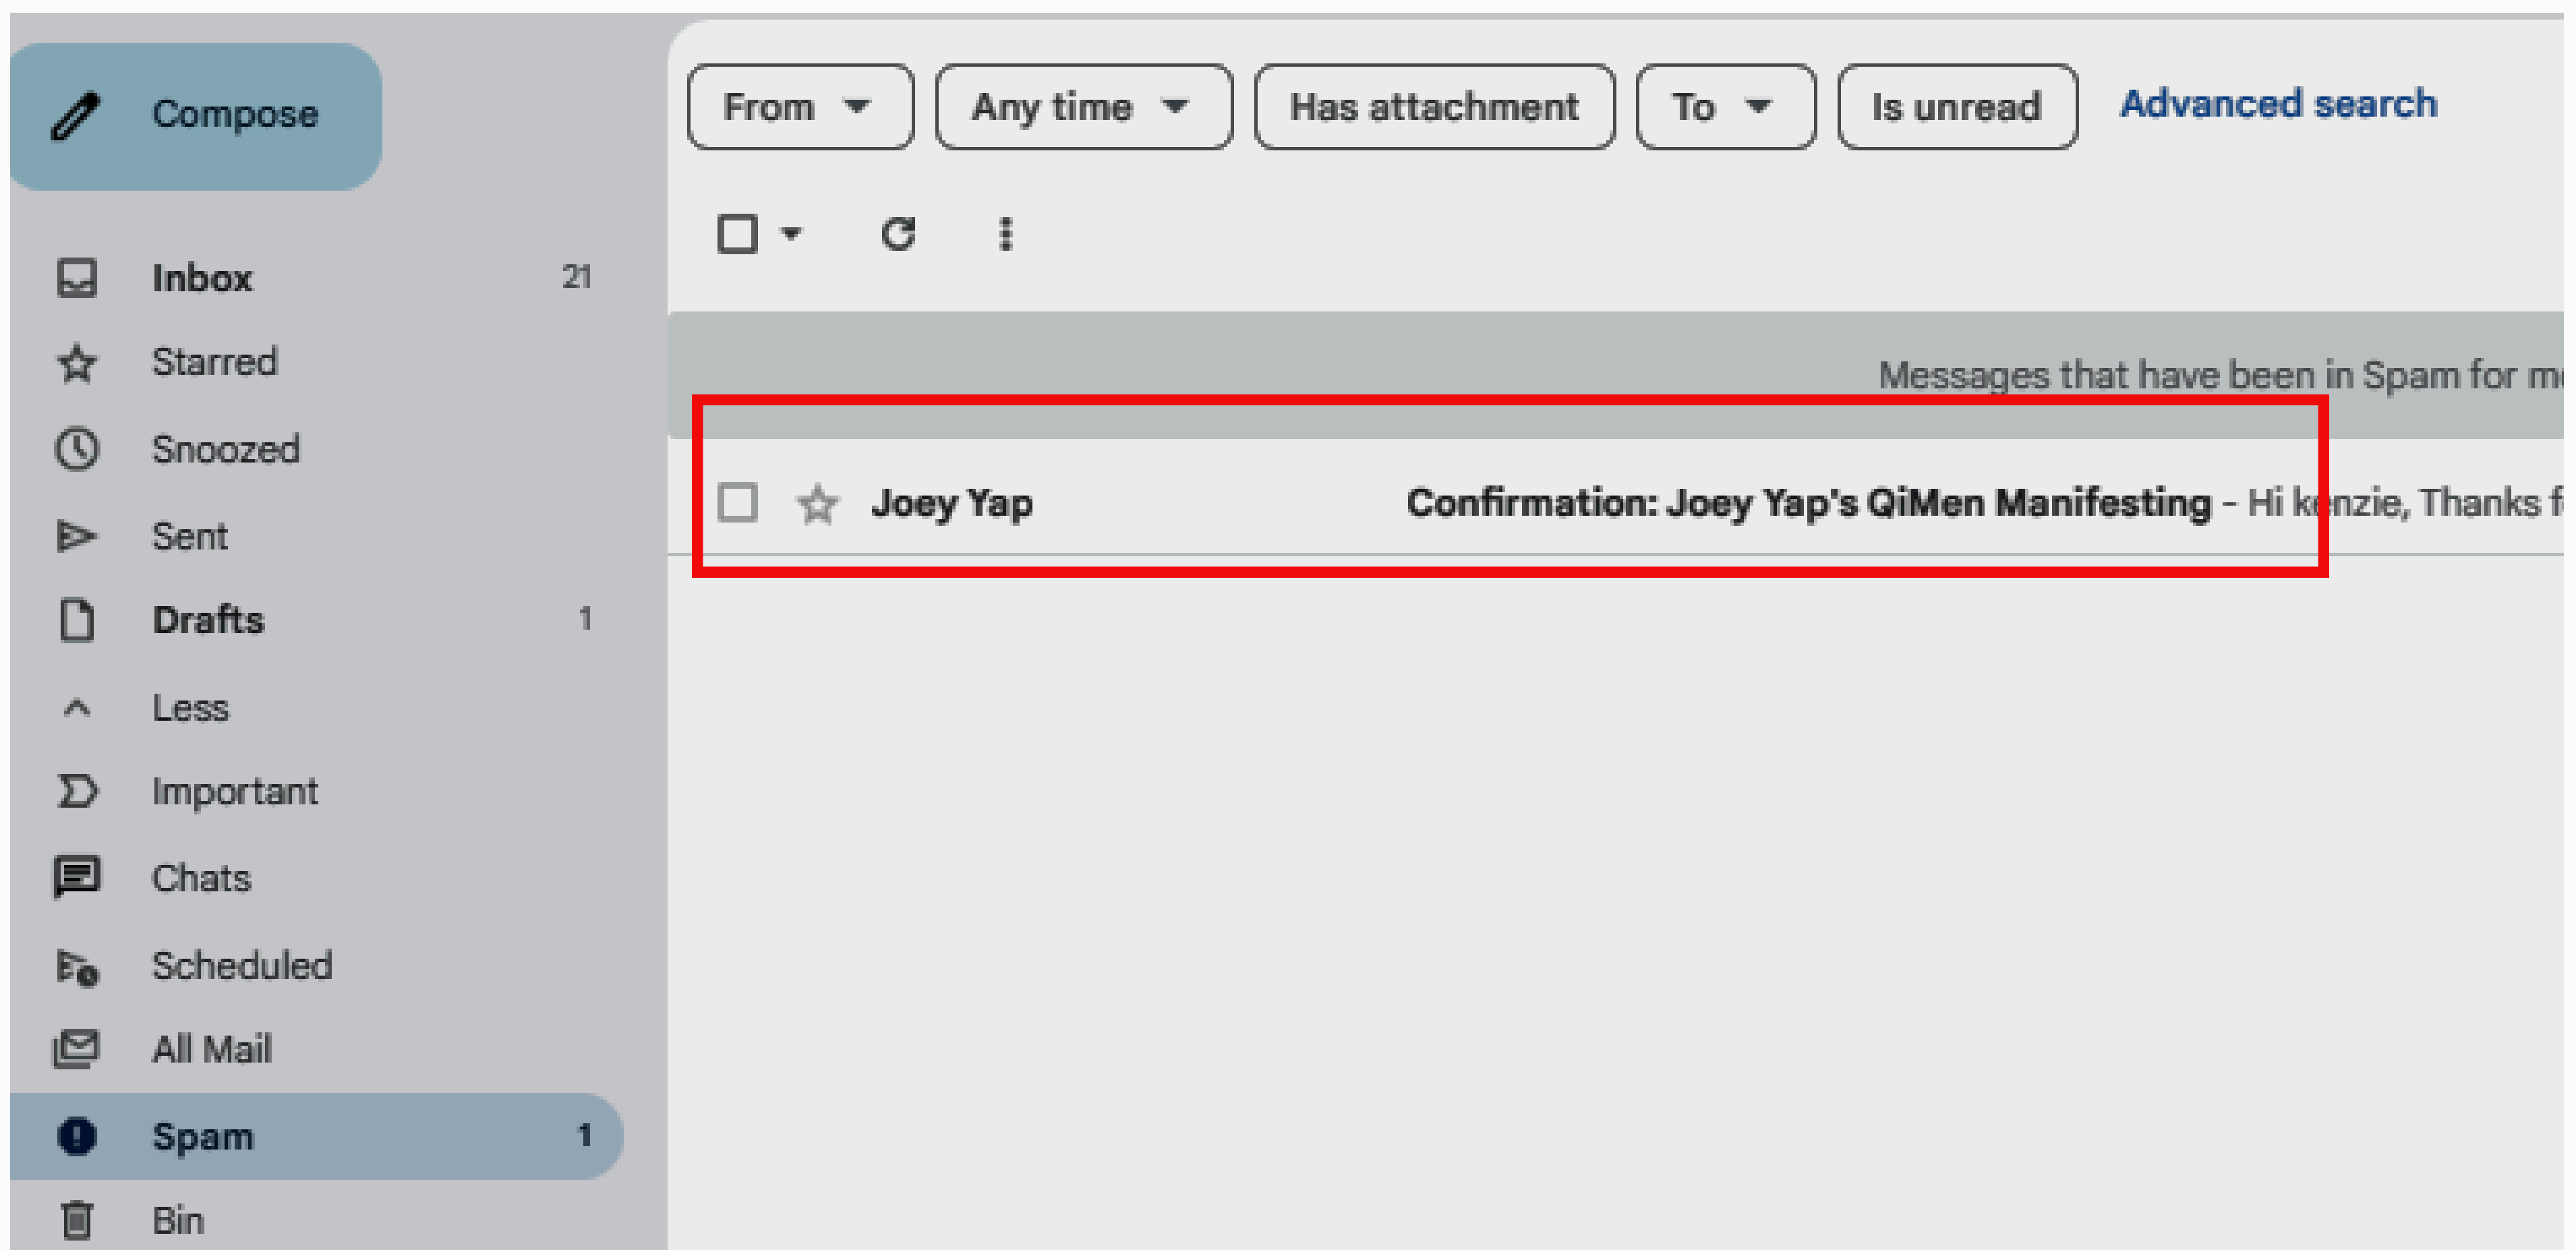

STEP 7:

At the left side bar, click on the drop down menu. You will see your Spam and Trash folder.

STEP 8:

Open the **spam** or **junk folder**, and scroll to see if the confirmation email is there.

Most email platforms share similar settings.

For a detailed, step-by-step guide on how to whitelist emails on different platforms, visit:
